E-commerce : Alibaba bat son record de 2019 en vendant 47,4 milliards d'euros de marchandise en un jour

Technologie : Le chiffre inclut les ventes générées le 1^{er} novembre. Mais c'est néanmoins un record notable qui marque la montée en puissance de l'acteur de e-commerce chinois sur la scène mondiale.

WE MUST THINK MOBILE FIRST

Nearly 80% of all time spent on social media is on a mobile. This means that we must consider the following very carefully...

- The size of the screen that the message is being displayed on
- The size and usability of content we are asking people to visit or download
- The native use of each platform (for example people rarely click on a link or google something they've been told to on Instagram as it would take them out of the platform but people often tag their friends in links on Facebook that they think they would love)

Amazon investit 5 fois plus dans la recherche que le CNRS

Amazon investit jusqu'à 14,2 milliards d'euros par an dans la recherche, c'est 5 fois moins que le CNRS, le Centre national de la recherche scientifique, regrette le docteur Laurent Alexandre, fondateur de Doctissimo et spécialiste de l'intelligence artificielle. Afin de rattraper le retard pris sur les GAFAM, il exhorte la France et l'Europe à réagir.

« Le décrochage numérique de l'Europe ne doit rien au hasard : nous n'investissons presque rien ! » tacle Laurent Alexandre dans une tribune incisive publiée par [l'Express](#) dans une chronique hebdomadaire. L'essayiste, réputé pour ses prises de position tranchées et sa plume alarmiste, est l'auteur de plusieurs livres sur le thème du transhumanisme, de l'intelligence artificielle et des progrès scientifiques.

CASE STUDY:

DOMINOS

- Instead of asking customers to call a store or order online, pizza chain Dominos created a chatbot called DOM that allows customers to order directly via Facebook messenger
- DOM was designed for regular customers as before you can use the service you are required to sign up to the Easy Order system, which along with an address and contact details, saves a 'favourite basket' which can be requested via the chatbot in future
- Dominos felt that it was important that their chatbot embodied the brand's personality so they've made sure he's funny too (pictured)

Le Slip Français acquiert le statut d'entreprise à mission

Entre l'âge de raison et l'adolescence, le Slip Français franchit une nouvelle étape en devenant une "entreprise à mission". Cette démarche concrétise un engagement de longue date envers les savoir-faire textile français et au service d'une mode responsable mettant en avant des produits durables et de qualité.

GOOGLE'S 9 PRINCIPLES OF INNOVATION

Innovation comes from everywhere

It is the job of everyone to innovate, from top to bottom and many times, by allowing each employee the opportunity to contribute to big innovative ideas, you will get some surprising results.

Focus on the User

Solve customer problems. Design a beautiful and useful user experience, and the revenue will follow.

Bet on Technical Insights

Think about whether your business has any unique insights or information assets that can be used and combined to innovate something new

Launch and Iterate

Ship your products out to market early and often rather than waiting until they are absolutely perfect to take them to market. The most important button on any product is the feedback button.

Think 10X

If you improve your process a little each day, you only achieve incremental progress. Innovative change means you need to think about how to change things by 10X

Default to open

By opening up your development to the world, you are tapping into a huge community of all the top 1% minds in the world.

Fail Well

If you don't fail often, you're not pushing the boundaries of innovation. Failure is a badge of honor. Be honest about it and fail with pride.

Have a Mission that Matters

The most important principle for innovation in your organization is having a mission that people can believe in. Having a sense of mission and purpose gets people in the door every day with the need to be innovative.

20% Time

Give your employees 20% of their time to focus on the items they are most passionate about. This truly allows everyone in the organization the time to act on their innovative spirit.
