Page 5|12

17.   C_____ and counting medication

18.   Completing patient assessments

19.   Administering wound care

20.   C_____ dressings

The daily routines of nurses rarely are the same twice. Working on the front line of patient care means they are always interacting with people who are in stressful situations, so nurses need to be empathetic and work well under pressure. They also have to react appropriately to emergencies and unexpected events, so good problem-solving skills and quick thinking are both ideal qualities for nurses.

Checking your understanding – Answer the questions

Say whether the statements are true or false.

Statements	True	False
Nurses' duties are diverse		
Nurses support patients only		
Nurses work and consult with other health care providers		
Daily routines are boring, repetitive		
Nurses are never interacting with people who are in stressful situations		

What are the qualities needed to be a nurse?
